OBJECTIVE

Enthusiastic computer science student eager to secure a data analytics engineer internship, aiming to leverage strong analytical skills and data-driven insights to solve complex business challenges and deliver actionable solutions.

EXPERIENCE

January 2024 – May 2024
Coding for Data · Global Career Accelerator

Drove data-driven decision-making by employing Python and SQL to conduct high-level data analysis projects, uncovering business challenges and presenting actionable recommendations.

COMMUNICATION

- Delivered data-driven insights and solutions for Intel and The Recording Academy, showcasing exceptional intercultural communication skills.

LEADERSHIP

- Actively participated in USF's Residence Hall Association and Area Council, orchestrating and contributing to a wide range of local and university-wide events.
- Worked with diverse student groups and spearheaded team assignments, enhancing team collaboration and driving team success during the Global Career Accelerator.
- Led Wharton High School's Future Business Leaders of America chapter as Co-President, steering the chapter to achieve multiple district and state-level placements.
